

Rolycab®

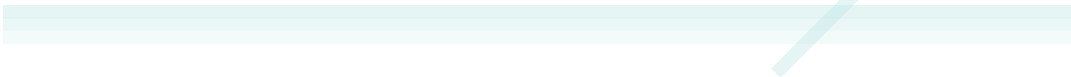

ARKEL

uPVC Architectural Elements

## About Us:

Rolycab is proud to introduce its new venture **ARKEL**.  
ARKEL introduces itself as manufacturers of uPVC Architectural Elements.  
Providing you with a wide range of uPVC profiles that adds to the aesthetic facade of a structure. Each of these profiles are designed, manufactured and installed as per project's requirement.  
**ARKEL** products are just a blend in, to leave a mark.  
We stand to our motto of quality is foremost at Rolycab.

## Louvers & Fins :

Harnessing the capacity of uPVC helps ARKEL profiles in forming a wide and complex range of geometrical formation in order to get a large array of louvers and fins. These Louvers & Fins not only help in creating a visual aesthetic appeal but also serves purpose of ventilation, shading and covering plumbing and open ducts of a structure.

These louvers & Fins acts as both visual appeal and also for utility purpose. ARKEL Louvers & Fins can be installed in any required angles.
